Dear Tony,

I am glad to hear that you are extremely interested in Chinese culture, especially Traditional Chinese Medicine. The TCM, as an important part of Chinese culture, has been attracting attention from all over the world.

The TCM, with its unique diagnostic methods—look, listen, question and feel the pulse, long history and remarkable effects, has been used to treat cancer and other serious diseases. Unlike the western medicine, the TCM has fewer side effects. Above all, compared with high fees of the western medicine, the TCM has a more reasonable price that ordinary people can afford.

In a word, the TCM has made great contributions to the development of Chinese health care. Welcome to learn about it.

Yours truly,

Li Hua
